## Installation Instructions

Model Number 5300

- 1) Disassemble frame from back plate.
- 2) Mount back plate to the wall using screw holes closest to the roll formed edge. Make sure the back plate is level and square.
- 3) Position mirror on the bottom edge of the back plate with mirror resting on the roll formed flange and hold in place. Make sure the mirror is firmly in the frame.
- 4) Starting at the bottom of the frame, place the frame over the edge of the back plate. Start to snap the frame onto the back plate working toward the corners. Then continue up the sides and across the top until the frame snaps in place.

*Product made in the USA.*
